Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the snap clip with the first segment/arm that is thickened adjacent the connection between the segment/arm and its base must be shown or the feature(s) canceled from the claim(s). No new matter should be entered. (see claim 1)

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 34 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. For claim 34, "the polygon" lacks antecedent basis.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 7-14 16, 18, 19, 32-34 and 37 are rejected under 35 U.S.C. 102(b) as being anticipated by Dupree. Dupree teaches a front panel (39) attached over an opening in an object/drawer/frame (Fig. 9; which is part of a cabinet/housing; see also Attachment A). The panel includes a plastic clip piece (7) having a base and a snap clip with opposed arms extending from the base. The arms each include first and second segments. The first segment of each arm defines an obtuse angle with respect to the base. The object includes a plastic post piece (20,24) received in the clip; the piece includes a base panel and non-circular /diamond posts (20). Furthermore, as best understood, the first segments are thickened adjacent their connections to the base (see Attachment A). Finally, both pieces include apertures (17,27) configured to

receive fasteners. Note: the claims are in "comprising" format; therefore, the cabinet can encompass features not specifically claimed, such as the panels/framing of the cabinet itself. Since the drawer of Dupree is part of a housing/cabinet and meets the structural limitations found in the body of the claims, the "cabinet" preamble portion is inherently met.

Allowable Subject Matter

Claims 3, 5, 6, 17, 35, and 36 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 20-22, 24-31 and 40-43 are allowed.

Response to Arguments

Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.
